Dr. Demetrios Papademetriou, President and Co-Founder of the Migration Policy Institute, and President of the Migration Policy Institute Europe

Presentation Title: Thinking about the Future: Migration and Mobility in the Age of Uncertainty

Abstract
Dr. Papademetriou will discuss the changing international landscape on migration and the challenges and opportunities these changes pose for all actors that engage the international migration system--sending and receiving communities, as well as immigrants and their families. He will pay particular attention to the new origins and destinations of large scale immigration and discuss the effects these changes will have in our understanding of, and behavior toward, all aspects of the migration system--from admission and integration policies, to issues of the protection of basic rights and the health and well-being of communities.
