ROOFTOP: THE RISE OF LIVING ARCHITECTURE

Green roofs are part of a vision of creative urban pioneers who are helping to insulate and protect buildings while the plants that cover them replenish the atmosphere. This exhibition documents green roofs by recording the beauty and value of these additions to architecture and the urban landscape.

PRIVATE PLACES

Gardens are a place of refuge—a place where one can read, meditate, and relax. In this exhibition, private gardens become the visible expression of the individual cultivating them in private spaces that are separate and apart from the larger society.
